Aim :- Replace PI Control
with AI/ML Technique

V* is Reference Voltage
V is Sensed Voltage
Verr PI input
PI output

} there 4 Columns are Provided in Data Sheet

⇒ Above Drawn block diagram is Part of a System. with well Controlled PI Control or AI/ML Control, Sensed Voltage (V) Reaches more Near to Reference Voltage (V*), Even during Disturbances.

⇒ It is not a Prediction Problem, Do not Even Prediction model with Data,
Aim of Project is to Reduce (Verr) PI input as much as Possible.
